Spring Clamps: VarioClippix XV5-100 & XV5-170

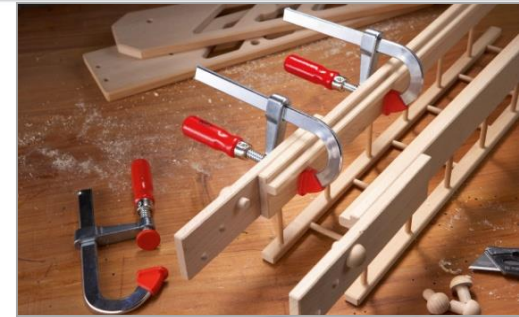

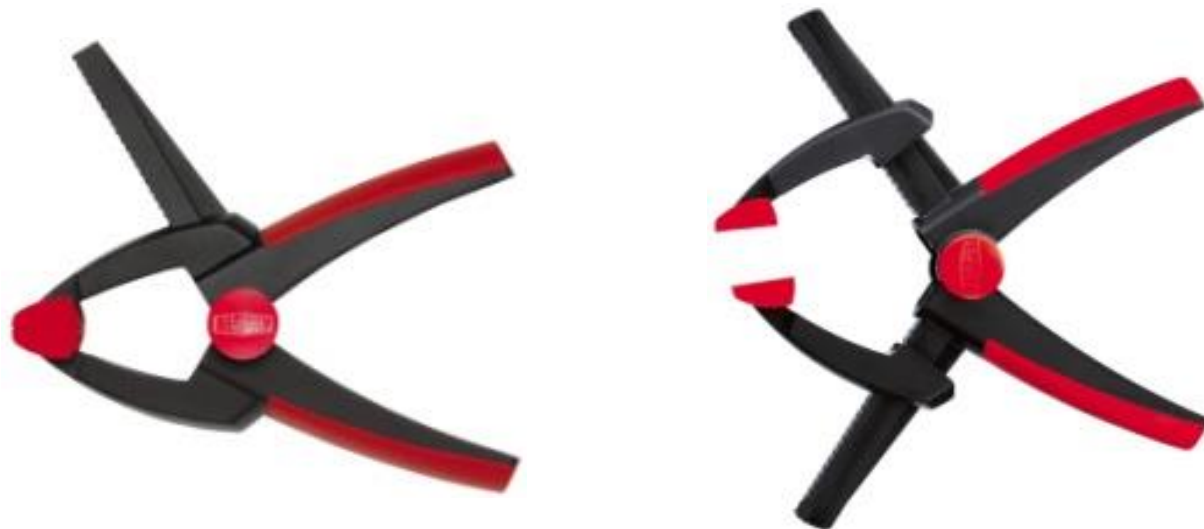

Spring Clamps: VarioClippix®

Simply better.

The unique XV series variable capacity spring clamps are a marriage of BESSEY® sliding arm technology with traditional spring clamp design.

- ❑ Large clamping capacity relative to overall size allows for a 6-½” clamping capacity with a grip size comparable to that of a traditional design 2” spring clamp.
- ❑ An added benefit of this design is that you can also vary the amount of clamping force being applied to the work piece.

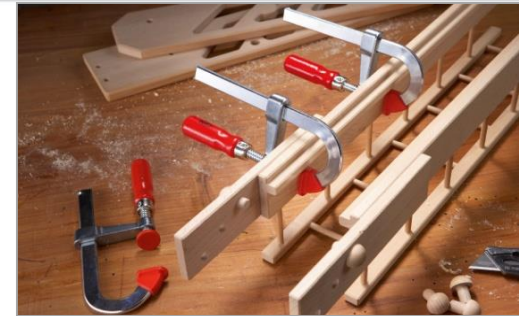

Spring Clamps: VarioClippix®

Simply better.

VarioClippix® XV5-100 & XV5-170
