

FOR IMMEDIATE RELEASE

BESSEY Pivot Handle Clamps (GZ Series)

Pivot handle clamps deliver the extra flexibility from the already uncompromising all steel bar clamp offering from BESSEY®. A 2K ergonomic handle and can be swiveled 90° for extra tightening and rotated 360° to access tight work areas.

German made pivot handle clamps deliver uncompromising quality with patented protected features and a technically advanced steel sliding arm. Less user effort is required as the 2-component handle can be swiveled 90° for additional leverage and tightening. The ability to rotate the handle 360° makes accessing challenging spaces easier.

The patented rail profile provides greater stability and enhanced clamping force per spindle turn for quicker set-ups. The heat treated, high carbon Acme threaded spindle is manufactured for high load capacity, durability and spatter resistance. U-shaped sliding arm transfers clamping force evenly across the surface of the forged piece improving power transmission and stability for a longer lasting tool.

The new pivot handle clamp from BESSEY comes in 5 clamping capacities (10, 12, 16, 20 & 24 Inches). All have a throat depth of 4 ¾" and a clamping force of 1,100 lbs.

BESSEY. Simply better
