

Telescopic Support Rod

STE series telescopic support rod and accessories

BESSEY® STE provides the support you are looking for. The single hand operation allows you to adjust the height with a twist of the wrist or push of the button. The robust design allows for higher load capacities.

1 Single hand operation

2-component plastic handle with pump mechanism keeps one hand free.

2 Extremely secure hold

Robust design allows for higher load capacities. PVC pads on top and bottom grab the surface for safe support.

3 Quick release button allows for fast retraction

Quick-slide button for rapid extension and retraction of the telescopic bar.

4 Heavy duty durable steel construction

Steel tube construction allows for higher load capacities.

5 Capable of 45° support

Continuously swivelling contact pads from -45° to +45°. Screw holes for additional support.

Telescopic support rod STE with pump grip

Single handed operation with 2K handle and pump, all while guaranteeing a reliable and secure hold. Fine tune adjustment by pressing the pump lever until the swivel pad lies against the work piece, then turn the grip to the desired holding force. Release by first turning the grip, then pressing the release button – safe, one-handed operation.

| | Adjustment Range | Clamping Force at min. extension | Clamping Force at max. extension | Approx. Weight |
|---------------|------------------|----------------------------------|----------------------------------|----------------|
| STE98 | 58"-98" | 770 lbs | 350 lbs | 7.46 lbs |
| STE118 | 67"-118" | 770 lbs | 240 lbs | 8.14 lbs |
| STE145 | 82"-145" | 770 lbs | 140 lbs | 9.77 lbs |

Telescopic Support Rod

STE series telescopic support rod and accessories

STE Series, Swivelling ceiling support accessory, STE-SP14

This accessory provides a wider platform upon which to support materials. This allows broader pressure distribution of force for items which may be a concern. STE-SP14 features a lightweight aluminium profile with skid resistant rubber. No tools required to attach the accessory. Use the existing top plate and insert plastic moulded screws to the STE-SP14 to secure. This accessory enables one to more confidently hold work materials (drywall, door trim, etc.) at varying heights, angles and with greater stability. Continuous swivelling for +45 to -45 degrees.

STE-SP14

STE Series, Support Stand, STE-TRIPOD

Use the STE-TRIPOD attachment stand when you need a telescoping support rod to stay where you have it first positioned. The tripod will stabilize the STE where you need extra help or are staging your work. The tripod is lightweight and durable (aluminum and glass fibre reinforced plastic construction) and easy to transport and assemble.

STE-TRIPOD

STE Series, Ceiling Support Accessory, STE-DS6

Similar to the STE-SP14, this accessory provides a wider platform upon which to support materials and to allow broader pressure distribution. BESSEY's STE-DS6 has three x 6 inch wings which can be attached to any STE to distribute force securely and evenly. Unfold the legs and mount to the telescopic rod easily and quickly without tools. Use the ceiling tripod to securely hold large sheets of drywall or any other ceiling materials that require extra support.

STE-DS6
