

# Compound leverage snips

BESSEY™'s innovative D39ASS brings an entirely new generation of compound leverage cutting snips to the market for the sheet metalworking industry. These snips enable more capacity, precision and comfort with easier operation as a result of innovative design and unique construction elements.

## 1 Easier to hold

The new D39ASS snips enjoy an optimised handle angle that allows one to comfortably grip the entire unit for maximum application of cutting force.

## 2 Smooth cutting action

The joint area includes a sintered steel insert. This clever addition greatly reduces friction where it counts! Great for extending the tool life and for an exceptionally smooth cutting action.

## 3 Convenient latch

A central latch on the top of the handle allows right and left-handed users to open and close the snips with ease, without a change in grip.

## 4 Cut straight, cut round, cut easier

The compact forged jaws permit high-precision cutting of curves while also being very effective at straight cuts. The shape of the forged jaw allows work to flow past the user's hand instead of towards for sustained (...and safer) cutting.

## Multi-use compound leverage snip, D39ASS

For continuous straight and curved cuts. Extremely compact cutter head with partially countersunk head screw connection for increased manoeuvrability and precision on curved cuts. Joint area screw connection with stud bolt, sintered disc and maintenance-free spring for extreme robustness. Reduced handle opening for optimised handling and an even cutting length.

|            | Overall Length | Blade Length | Cutting Capacity<br>(carbon steel) | Approx. Weight |
|------------|----------------|--------------|------------------------------------|----------------|
| D39ASS-SB  | 9 3/16"        | 1 5/16"      | 18 gauge                           | 1.15 lbs       |
| D39ASSL-SB | 9 3/16"        | 1 5/16"      | 18 gauge                           | 1.15 lbs       |
